Gople

Bjarke Ingels Group
↪ 2019

BIG is a group of architects, designers and thinkers operating within the fields of architecture, urbanism, research and development with offices in Copenhagen and New York City. BIG has created a reputation for completing buildings that are as programmatically and technically innovative as they are cost and resource conscious, incorporating overlapping design disciplines for a new paradigm in architecture. BIG believe strongly in research as a design tool.

➤ Murano Glass

A powerful LED light source is housed within a handblown glass diffuser, produced according to ancient Venetian glassblowing techniques and created in Murano. The soft glass helps diffuse a soft glow, as light fills the pill shaped diffuser. The diffuser is available in three options: crystal glass with a white gradient, transparent glass with a silver or copper metallic finish.

➤ The Human Light

Gople Lamp is the perfect example of Artemide's guiding philosophy of "The Human Light": it aspires to create light that is good for the wellness of man and for the environment that has a positive impact on our quality of life.

➤ Gople Typologies

The human and responsible light goes hand in hand with design and material savoir-faire, combining next-generation technology with ancient techniques. It is a perfect expression of sustainable design. The end result is a product that

delivers both visual comfort and aesthetic value, while contributing to the wellness of both man and the environment. Gople is now available in a complete product family with suspension, ceiling, floor, and table versions.
