

SKYDRO

BY
ROSS LOVEGROVE

ROSS LOVEGROVE

Born in Wales in 1958, Ross Lovegrove is a visionary industrial designer for whom the inherent logic and beauty of nature are paramount to any man-made object. Having designed everything from modes of transportation to furniture to human-scale electronic devices, minimal organic beauty underlies every concept.

Widely published and award-winning, Lovegrove creates beauty through the marriage of biology and object. His TED talks on the topic of "Fat-Free" organic design have been viewed over 4 million times.

REFLECTIVE

Skydro transforms interiors with its constellation of reflective pebbles that embody the nuances and energy of its surrounding environment. Skydro is composed of ABS injection-molded reflective base with a lighting unit in die-cast aluminum and a painted steel bearing structure.

SCULPTURAL

The Skydro can be customized by adding extra units and are available in non-electrified or electrified circuits with optional halogen or LED light. Skydro is equally stunning as a lighting fixture or as decorative structural art.

INGENUITY

The Skydro can be customized by adding extra units, meant to enhance modern interiors. Skydro has the ability to be customized in various patterns, making every installation unique. The ability to customize makes Skydro an object of desire that can bring imagination to reality.

CUSTOM APPLICATIONS

A wide range of customized configurations can be dreamed of using the Skydro lighting and non-lighting shapes in a cluster. For more information regarding custom applications, please contact your Artemide Sales Representative.
